

SAP BUSINESS OBJECTS ADMINISTRATION WITH BLISSFULLY SIMPLE EASE

INFOLYTIK

Infolytik's solutions **EMPOWER** every member in the BI value chain with the most comprehensive capabilities for administration and analysis of their XI3 or BI4 landscape, including:

IMPACT ANALYSIS & DATA LINEAGE

- End-to-end traceability from datasource **universe/BEx** report/dashboard
- 10x more metadata, 10x faster setup than Information Steward

PROMOTION AND BACKUP

- Archive content offline or transport to other systems
- Selectively restore public, favorite or inbox documents with a single click
- Dynamically backup multiple environments at once

DISASTER RECOVERY

- Automate multi-CMS synchronization in real time

CHANGE MANAGEMENT & VERSIONING

- Visually compare data, metadata and report style and restore previous versions Information Steward

REAL-TIME SYSTEM AND USER MONITORING

- Immediate visibility into **bottlenecks & hotspots**
- Gain system usage insights
Plan for capacity issues

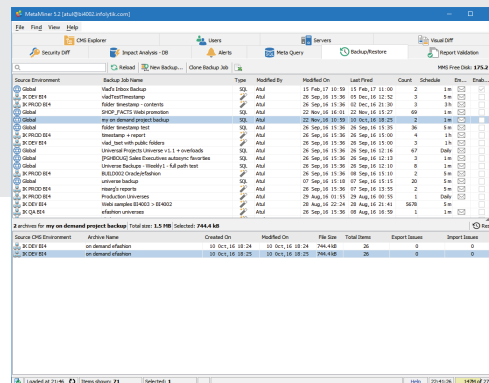

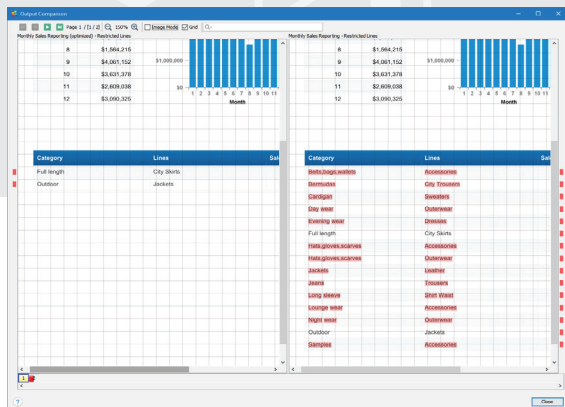

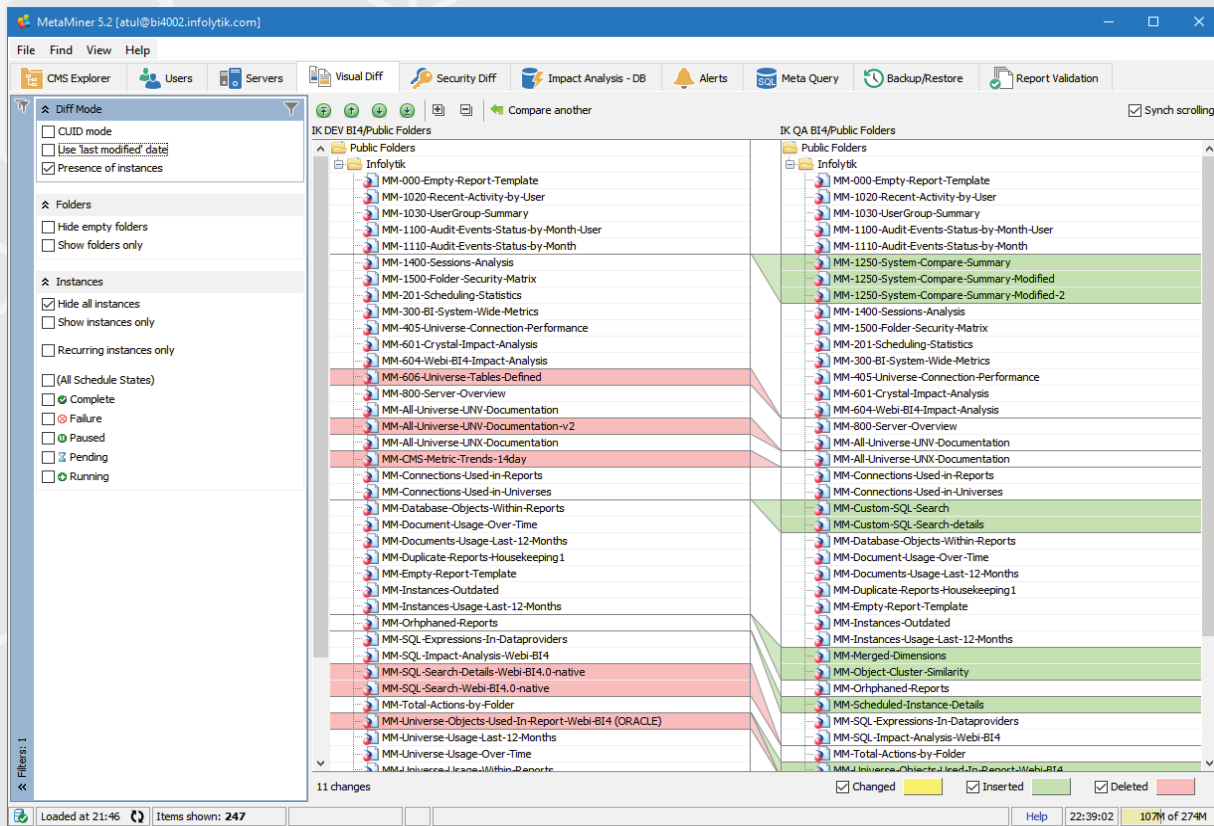

DATA VALIDATION TESTING

- Compare actual report output histories and guarantee data correctness
- Rules-driven automation allows changes to be captured (e.g. when someone modified a universe) only when it makes sense

INFOLYTIK

"I can no longer imagine using BusinessObjects without MetaMiner. It allows us to get realtime data on the usage of our BusinessObjects system, monitor the growth of the organizational use of the platform and perform metadata management/impact analysis across our BI topology"

ETHAN SHALEV,
 Manager of Business Objects Operations
 Yashir IDI
